

creative brief

project three

- For this project, I want to work more on my first IOS project.
- I currently have the BAC calculator set up and working, but I would like to explore other ways to organize the information the user needs to input. I want to find other ways to display information about the app and make it easier to use. I would also like to add an option to choose a state as different states have different legal limits. I want to implement scrolling, because there is a lot of information and I feel it would look nicer if the user could scroll.
- Design:

Picture of my first IOS project
I will have the same choices
available and would like to
keep this color scheme or use
something similar.
